Business Unit Professional Hygiene – *Product Management*

To whom it may concern

Statement

Essity Professional Hygiene confirms that all Tork products comply with Directive 2001/95/EC of the European Parliament and of the Council of 3 December 2001 on General Product Safety and other respective EU regulations for Hygiene paper tissue/non-woven products.

These products are primarily made out of virgin and/or recycled cellulose pulp and/or non-woven materials. The manufacturing process is supported by EU approved chemicals to ensure the required functionality of the products, e.g. wet-strength. All added ingredients/chemicals are chosen after careful evaluation. They are internally assessed to ensure that they are safe for use and are in compliance with the EU regulation REACH as well as in compliance with the European product Safety Directive.

All products listed in the attached document are in compliance with Regulation (EC) No 1935/2004 on materials and articles intended to come into contact with food and manufactured in accordance with Regulation (EC) 2023/2006 Good Manufacturing Practice (GMP) applicable to all Food Contact Materials. All raw materials for those specific products are in accordance with the German BfR Recommendation XXXVI and Regulation (EC) No 10/2011 (for the synthetic fibers used in the non-wovens) for the health-related evaluation of materials and objects for the contact with foodstuffs in the frame of the Foodstuffs and Animal Feed Code.
